

The
Salisbury
Centre

Environmental Policy

The Centre has clear policies on **Environmental Issues**.

The Centre reserves the right to cancel any event which is determined to be operating against these policies.

The Salisbury Centre SCIO believes that organisations are responsible for achieving good environmental practice and operating in a sustainable manner.

We are therefore committed to minimising our environmental impact and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods

It is our priority to encourage our building users, suppliers and all business associates to do the same. Our policy is to:

- Minimise energy and water usage and to help our building users to do this as well.
- Minimise our consumption of natural resources, especially where they are non-renewable.
- Minimise our waste and then reuse or recycle as much of it as possible.
- Use walking, cycling, public transport and car sharing as our preferred means of transport.
- Minimise any negative impacts from our operations on the environment and local community.
- Purchase products and services that do the least damage to the environment and encourage others to do the same, particularly our own suppliers.
- Assess the environmental impact of any new processes or products we intend to introduce in advance.
- Avoid using any products or services that can potentially cause damage or harm to living organisms.
